Mythic Cards – General Terms and Conditions (GTC)

As of: 26 September 2026

1. Scope of Application, Definitions

1.1. These General Terms and Conditions (GTC) apply to all contracts entered into between the provider Pacoma Creative Labs – Owner: Christian Renschler, c/o Impressumservice Dein-Impressum, Stettiner Str. 41, 35410 Hungen, Germany, Tel.: 01579-2341658, info@mythiccards.ai (the “Provider”), and users of the “Mythic Cards” platform (the “User(s)”) via the website mythiccards.ai.

1.2. Any differing terms and conditions of Users shall not apply unless expressly agreed by the Provider in writing.

1.3. A “User” of Mythic Cards may be any natural person who has reached the age of 18, as well as any legal entity or partnership with legal capacity.

1.4. A “Consumer” is any natural person who uses the services for private purposes. An “Entrepreneur” is any person who, when entering into a contract, acts in the exercise of their commercial or self-employed professional activity.

1.5. “Credits” are digital units without monetary value that may be used exclusively for generating digital trading cards, using the “Copy Function”, generating an example character, and using Print-Ready export or upscale functions on the Mythic Cards platform. Credits are not redeemable for cash. Internal Credit restoration under these GTC and mandatory statutory rights remain unaffected. Credits are not freely transferable to other Users, may not be gifted, and may not be traded. Credits may be used exclusively within the platform; any use outside the platform, in particular with third parties or as a general means of payment, is excluded. A system-side crediting of Credits to other Users occurs exclusively within the scope of the Copy Function pursuant to Section 2.5; this does not create any right to payout, free transfer, trading, or gifting.

1.6. “Race Tokens” are digital units that are credited to the User account regularly depending on the selected subscription tier and are used exclusively to permanently save (“anchor”) races created in the race editor and/or to occupy a race slot. They are neither refundable nor payable in cash, tradable, nor transferable to other Users.

1.7. An “Original Card” is a card that a User generated or created with Mythic Cards, or created from their own material, and that does not originate from the Copy Function.

1.8. A “Copied Card” is a private copy of a publicly accessible Original Card that is added to the copying User’s Library through the Copy Function. Copied Cards are private Library items and are not eligible for public platform visibility unless the Provider expressly enables a different feature in the future.

1.9. A “Public Profile” is a publicly accessible creator profile. The User may feature up to four own eligible Original Cards in a public “Showcase”.

1.10. “Monthly Generation Allowance” means a separate monthly quota that limits new AI card

generations and example-character generations during a billing period. It is distinct from Credits. The Monthly Generation Allowance is reset for each billing period and is not saved up or carried over without an express separate agreement. The Copy Function and Print-Ready export or upscale functions do not reduce the Monthly Generation Allowance.

1.11. "Closed Beta" means a limited availability phase in which subscription slots, plan changes, payment flows, generations, Print-Ready exports, and related features may be limited, paused, or made available only gradually for capacity, cost, security, or stability reasons.

2. Subject Matter of the Contract and Service Description

2.1. The Provider operates the "Mythic Cards" online platform for AI-based generation of digital trading cards ("digital cards"). Digital cards are generated using AI models of an external service provider (OpenAI). The specific results and functions may therefore depend on the availability and functionality of this service. The Provider has limited influence on the content details or any technical limitations of this service.

Mythic Cards may offer different AI models, quality levels, generation methods and technical configurations. Available options may change as the service and underlying technology evolve. The currently available options and applicable Credit price are displayed in the generation interface before submission. No particular model, model version or technical configuration is guaranteed to remain available permanently. The protections for changes to the service and these GTC, including Sections 11.5, 11.6 and 12.3, and mandatory statutory rights remain unaffected.

2.2. Users can specify the card name, the card rarity ("Uncommon", "Rare", "Epic", "Legendary", and "Ultra Mythic"), and the card frame from a list, and enter a description and motifs via prompts.

Ordinary Generate uses text and the selected generation settings without selected image references. Where available to the User, Card and Freestyle Reference Edit uses one to four verified image references for image-guided generation or editing. References may be eligible existing Mythic Cards that the User owns in the platform, private uploaded images, or a combination of both. Each paid Reference Edit request creates one output Card.

The verified reference image data is supplied to the AI provider with the generation instructions.

Images may influence or be reflected in the output's subjects, appearance, composition and other visual elements. Processing is not limited to style analysis. The User must have the necessary rights and permissions for every selected or uploaded reference, including its processing by the AI provider and the intended use of the output. Having a Card in an account does not itself establish those rights. The Reference Edit output starts private. If eligible, the User may later choose to publish it through the platform's public presentation features. Publication of the output does not automatically publish the source reference files or their private provenance records, although the output may visibly reflect material from the references. Public visibility remains subject to Section 2.5 and the Content Policy. Selecting an existing Card does not make its original image a temporary upload or cause its deletion after generation. Temporary reference uploads are cleaned up separately and asynchronously; cleanup may be delayed by active requests, retries, support or security needs. Limited technical and accounting records may be retained separately from the image files, as described in the Privacy Policy. A reference that expires, is deleted or fails a safety or integrity check may become unavailable. A request that cannot use its required references may fail rather than continue without them.

These Reference Edit provisions do not make a feature generally available before it is enabled for the User. They do not release Universe Cover, Faction Visual or other Admin Preview features.

2.3. Generation is credit-based: by confirming the displayed price and clicking the "Generate" button, the User submits a request to create a digital card using Credits. Requests are processed after acceptance and are not guaranteed to finish immediately. Completed cards are made available to the User account and can be downloaded as image files (e.g., PNG/WebP) and optionally exported as a spritesheet (ZIP) for Tabletop Simulator or similar private game/tabletop workflows. Mythic Cards is

not affiliated with, endorsed by, or officially connected to Tabletop Simulator or any other third-party game, tabletop, marketplace, or print provider unless expressly stated otherwise.

The final generation price, including any reference surcharge, is deducted from wallet Credits and consumes the same amount of Monthly Generation Allowance for the applicable billing period. Credits and allowance are separate requirements: allowance is a usage limit, not a second money payment or an alternative to Credits. An eligible active subscription, sufficient Credits and available applicable allowance are required. Purchasing additional Credits does not itself increase or reset the allowance.

2.4. The number of Credits required for generation is not based on rarity (“Uncommon”, “Rare”, “Epic”, “Legendary”, “Ultra Mythic”). It depends on the available generation options selected and any applicable additional services. The current price and its components are displayed in the Generate interface before submission and must be confirmed before execution. Quality levels are technical settings and do not guarantee any specific artistic result.

For Card and Freestyle Reference Edit, the first verified reference image is included in the selected generation price. Each additional verified reference image currently adds 1 Credit, up to a maximum of four reference images in total. Only image references verified for use in that request count towards the surcharge; text instructions and other prompt context do not. Any future change to the reference surcharge must be shown before submission and confirmed as part of the final price, subject to the applicable notice and contractual-change protections in these GTC.

The final server-confirmed Credit price shown before generation is authoritative for the accepted request. If it changes before acceptance, the User must confirm the new price before proceeding. Later price changes do not increase the price of an already accepted request. The applicable Credit price for race example generation is likewise displayed before that action. Copy pricing follows the stored original final per-Card price under Section 2.5.1, rather than current generation prices.

2.5. The User account includes a personal gallery (“Library”) and public platform features such as the Discovery Board, Public Profile, Showcase, likes, copy features, Top Cards, rankings, and similar public areas or signals. The User may keep eligible cards private, unlisted, or public where the respective option is technically available. Public visibility is an optional platform feature and does not create a permanent right to publication, ranking, reach, likes, copy availability, or placement in Discovery, Top Cards, seasonal rankings, creator rankings, or other public areas. The Provider may curate, limit, hide, remove, pause, or disable public visibility and public platform features for capacity, security, abuse prevention, moderation, legal, rights-protection, or product reasons.

2.5.1. Copy Function and Creator Credits: Publicly accessible Original Cards of other Users can be added to the copying User’s Library by using Credits via the “Copy card” button where technically available. Within the Copy Function, when copying a public or Showcase-accessible Original Card, the originally stored Credit amount for the copied card is automatically deducted system-side from the copying User’s balance and credited to the card creator. This immutable amount is the original final per-Card Credit price, including any reference surcharge applied when the Card was generated. It may differ according to the generation options and prices that applied at that time. Later changes to generation prices do not reprice an existing Card for Copy. Copy does not invoke a new AI generation and does not consume Monthly Generation Allowance.

The copying User sees the applicable Copy Credit cost before copying. The card creator receives exactly these Copy Credits as a system-side credit on the Mythic Cards platform. Creator Credits are platform Credits only. They are not money, not income, not a financial return, not payable in cash, not freely transferable, not tradable, and not a claim against the Provider outside the platform. They may be used only within Mythic Cards under the applicable platform rules. A User may copy a public card of another User only once.

2.5.2. Private use and restrictions for Copied Cards: Copied Cards are stored in the private Library of the copying User. Subject to applicable law, third-party rights, these GTC, and the Content Policy, the copying

User may use a Copied Card privately, including for their private collection, download, Print-Ready export, shirt/poster/merch workflow tests, private creative projects, and private game or tabletop projects. This does not guarantee that the User has commercial rights, merchandising rights, print-on-demand acceptance, third-party approvals, or freedom from copyright, trademark, personality, or other third-party rights. The User remains responsible for checking whether any private, commercial, print, merch, game, or tabletop use is lawful.

2.5.3. Public platform restrictions for Copied Cards: Copied Cards may not be published as public platform cards. They may not appear on the Discovery Board, in a Public Profile Showcase, in Top Cards, rankings, season rankings, creator rankings, or other public platform rankings, and may not serve as a public copy source for other Users. Copied Cards may not be used to bypass, manipulate, dilute, or replace the public visibility, likes, Discovery placement, Copy Function, Creator Credits, or creator ranking of the Original Card or its original creator. Only the original creator may make the Original Card available for public platform surfaces such as Discovery, Public Profile Showcase, or other public areas, subject to these GTC and the platform's technical and moderation rules. The Provider may technically enforce these restrictions and may limit or disable public visibility, Showcase eligibility, copy eligibility, like eligibility, ranking eligibility, or related features for Copied Cards.

2.5.4. Public Profile and Showcase: Users may use a public profile and may feature up to four own eligible Original Cards in the Showcase. Showcase publication is separate from publication on the Discovery Board. A card may be visible in the Showcase on the User's public profile without appearing on the Discovery Board. Other Users may view Showcase cards and, where technically available, like them and copy them through the Copy Function. The same Credit and Copy Function rules apply to eligible Showcase cards as to Discovery-public cards. Copied Cards and cards that are blocked, moderated, taken down, or otherwise not eligible for public visibility may not be featured in the Showcase. If a User removes a card from the Showcase, copies that were already created by other Users remain in their Libraries, subject to the private-use restrictions for Copied Cards.

2.6. Race creation: Depending on the subscription tier, the User may create and save their own "Races/Peoples" ("race slots"). Creation includes: (i) definition (name, traits, attributes), (ii) generation of an example character using Credits, (iii) saving/anchoring using a Race Token. The Credit amount for generating an example character may vary depending on the selected AI model, quality level, image size, and current pricing logic; the amount displayed before generation is decisive. Using a Race Token to anchor a race is irreversible. Generating an example character additionally reduces the User's Monthly Generation Allowance. The User may optionally publish self-created races. Published races may be used by other Users free of charge. If a published race is deleted by its original creator, it will no longer be publicly available.

2.7. Generated digital cards are available in the User's Library after successful completion. Performance is deemed provided once the card is displayed in the User account and download/export is technically enabled.

2.8. During Closed Beta or other limited availability phases, subscriptions may be limited per plan and a visible subscription tier may be temporarily sold out or unavailable. Waitlist participation is non-binding and does not guarantee access to a subscription slot, a specific plan, or a specific launch price.

2.9. The Provider may temporarily pause new subscriptions, new AI generations, or new Print-Ready exports for capacity, cost, security, maintenance, abuse-prevention, or stability reasons. Existing paid Credits remain subject to these GTC and can continue to be used once the relevant feature is available again, provided the User has an active subscription and the feature is otherwise available.

2.10. Print-Ready exports and upscale functions

2.10.1. Print-Ready export functions

Users with an active subscription can create temporary Print-Ready export files for their own cards. Standard Print Export creates a print-oriented PNG file with brightness and color correction.

AI Enhanced Upscale creates a print-oriented PNG file using external AI upscaling or image enhancement services. Standard Print Export currently costs 1 Credit and AI Enhanced Upscale currently costs 3 Credits. The Credit amount displayed before the respective export is started is decisive.

2.10.2. Adaptive output size and file-size optimization

Print-Ready exports create print-oriented PNG files using the output options displayed in the export interface. To help meet third-party upload limits, the final output size and file size may be adjusted automatically. Technical limits and optimization settings may change as compatibility requirements evolve. These measures do not guarantee that every third-party provider will accept every file.

2.10.3. Third-party providers, print results and User responsibility

Print-Ready exports are technical helper files for upload to third-party providers. The Provider does not guarantee that every print-on-demand service will accept every file or that a specific print result will be achieved. Print quality and upload compatibility may vary in particular depending on the selected print provider, its current file requirements, upload limits, textile, shirt color, print process, placement, crop/bleed and other settings. The User is responsible for checking the requirements of the selected third-party provider before placing an order. Print-Ready exports do not guarantee that the underlying motif, prompt, uploaded image, card name, text, character, brand reference, or other content is free from third-party rights, including copyright, trademark, design, personality, publicity, or other rights. The User is responsible for ensuring that they have all rights required for the intended private, commercial, print, merch, resale, game, or tabletop use.

2.10.4. Temporary export artifacts and repeat download

Print-Ready exports are temporary export artifacts and are not permanent card assets. The Provider may limit the number of stored Print-Ready exports per User. Currently, the newest 10 Print-Ready exports per User are retained; older exports may be deleted automatically. As long as an export is available, downloading the same export artifact again is free of charge. Creating a new export requires an active subscription and may cost Credits.

2.10.5. Failures and Credit refund

If creation of a Print-Ready export fails before a usable export has been provided, the Credits deducted for that export are automatically refunded to the extent a charge has already occurred. This applies in particular if a file still exceeds the internal hard file-size limit after technical optimization, or if an external service required for AI Enhanced Upscale cannot be completed successfully. If a finished export already exists but a download link cannot be generated, the User can retry the download from Recent Print-Ready Exports.

2.10.6. Copied Cards and Print-Ready

Where technically available, Copied Cards may be used for private Print-Ready, shirt/poster/merch, creative, game, or tabletop workflows only within the limits set out in these GTC. This does not grant additional public platform rights and does not override the restrictions in Sections 2.5.2 and 2.5.3. Commercial use or resale is permitted only to the extent the User has all necessary rights and does not violate third-party rights, applicable law, these GTC, or the Content Policy.

2.11. Qualifying failures of paid Card and Freestyle Reference Edit

If a paid Reference Edit request accepted under these provisions ends in a qualifying failure, recorded wallet Credits may be restored under the platform's failure rules. Restoration is limited to the verified amount actually deducted and is made at most once. A failed request with no deduction does not create a Credit refund. Restoration depends on valid charge records and an available account to receive it; deleting an account does not recreate a wallet or preserve forfeited Credits.

Monthly Generation Allowance restoration is assessed separately. Usage can be restored only within the same still-applicable allowance period. If that period has ended or changed, current-period usage is not reduced for an earlier request. Restoration may also be unavailable if the subscription or allowance is no longer applicable or the relevant records cannot be verified. Allowance restoration

may therefore be zero even when wallet Credits are restored. Settlement may take time. These rules describe internal Credit and allowance restoration for covered paid Reference Edit requests. They do not promise cash refunds or restoration for every unsuccessful or unsatisfactory result, and they do not change the treatment of earlier generations or historical refunds. The separate Print-Ready failure rule in Section 2.10.5 and mandatory statutory rights remain unaffected.

3. Subscription Tiers, Credits and Payment

3.1. The User may choose between the following monthly subscription tiers:

Subscription tier Monthly price Credits Race Tokens

Basic EUR 12.50 120 1

Pro EUR 25 270 2

Legendary EUR 62.50 750 5

Ultramythic EUR 125 1,650 10

3.2. Subscriptions are concluded for a term of one month.

3.3. Credits and Race Tokens are credited monthly according to the subscription tier. At the beginning of each billing period, the Monthly Generation Allowance is also set according to the active subscription tier or the capacity settings displayed on the platform. Unless expressly stated otherwise, the Monthly Generation Allowance corresponds to the monthly Credits of the active plan, but it may be adjusted for capacity or launch reasons. Unused Credits and Race Tokens do not expire as long as the subscription is active. The Monthly Generation Allowance is reset for each billing period and does not accumulate. After cancellation, Credits and Race Tokens are suspended; they can only be used again after reactivating a subscription.

3.3.1. If the Monthly Generation Allowance for a billing period is used up, the User may no longer start new AI card generations or example-character generations for that billing period. Remaining normal Credits may still be used for the Copy Function and Print-Ready exports or upscales, provided the User has an active subscription and the relevant feature is available.

3.4. Users with an active subscription can purchase additional Credits via one-off purchases ("Credit Packs"):

Credit Pack Credits Purchase price

Small Pack 200 EUR 20

Medium Pack 500 EUR 45

Large Pack 1,200 EUR 90

3.5. Credit Packs can be purchased only by active subscribers. For expired or cancelled subscriptions, Credits are locked until the subscription is reactivated, but do not expire as long as the User account exists.

3.6. All prices shown on the platform are final prices in euros. Pursuant to Section 19 of the German VAT Act (UStG) (small-business regulation), no VAT is currently charged and therefore not shown. If VAT becomes applicable in the future (e.g., due to a change in VAT status), the final prices for consumers remain unaffected unless a price change is announced on a case-by-case basis in accordance with Section 12.3 (changes to these GTC/price adjustments). The Provider may offer temporary promotional prices or discounts. Promotional prices may differ from the regular list prices shown in these GTC. The total price displayed during the checkout process is decisive.

3.7. During Closed Beta or other limited availability phases, upgrades and downgrades may be subject to available slots in the target plan. A plan change can be refused or postponed if the target plan has no available slot or if plan changes are otherwise paused. Unless expressly stated otherwise, scheduled upgrades and downgrades become effective only at the next billing period and do not grant additional Credits or Race Tokens immediately.

3.8. Credit Packs increase the User's normal Credit balance only. They do not increase or reset the

Monthly Generation Allowance.

4. Payment Terms

4.1. Payment for subscriptions: Subscription fees are due in advance for each billing period (monthly) upon subscription completion and on the same calendar day of each subsequent month. By subscribing, you authorize us to collect the agreed subscription fees via your chosen payment method on the due date. In the event of delays or chargebacks, we reserve the right to temporarily suspend access to the platform until full payment is received and to claim statutory default interest. Further claims remain unaffected.

4.2. Payment for one-off purchases: Payment for one-off purchases is due in advance upon completion of the order process. Purchased Credits will be credited to the User account after receipt of payment.

4.3. All payments are processed exclusively via the payment service providers listed on the platform website.

5. Contract Formation

5.1. Subscription contracts: The presentation of subscription tiers on the website does not constitute a binding offer. Only by completing the order process and clicking the button indicating a payment obligation do Users submit a binding offer to conclude a subscription contract. Before completing the order process, Users must expressly confirm that they have taken note of these GTC and consent to the waiver of their right of withdrawal where applicable. The Provider accepts the offer by explicit confirmation by email or by activating the User account and subscription services. The contract text, including these GTC, will be provided to the User by email after conclusion of the contract.

5.2. One-off purchases (e.g., Credit Packs): The presentation of products on the website does not constitute a binding offer. Only by completing the order process and clicking the button indicating a payment obligation do Users submit a binding offer to purchase. Before completing the order process, Users must expressly confirm that they have taken note of these GTC and consent to the waiver of their right of withdrawal where applicable. Acceptance occurs by crediting the purchased Credits to the User account or by explicit acceptance declaration by the Provider in text form. In this case as well, the User will receive the contract text, including these GTC, by email after conclusion of the contract.

6. Right of Withdrawal

6.1. You have the right to withdraw from this contract within fourteen (14) days without giving any reason.

6.2. The withdrawal period is fourteen (14) days from the day the contract is concluded.

6.3. To exercise your right of withdrawal, you must inform us (Pacoma Creative Labs – Owner: Christian Renschler, c/o Impressumservice Dein-Impressum, Stettiner Str. 41, 35410 Hungen, Germany, Tel.: 01579-2341658, info@mythiccards.ai) of your decision to withdraw from this contract by an unequivocal statement (e.g., by email).

6.4. You may use the attached model withdrawal form, but it is not obligatory:

To:

Pacoma Creative Labs

Owner: Christian Renschler

c/o Impressumservice Dein-Impressum

Stettiner Str. 41

35410 Hungen

Germany

Email: info@mythiccards.ai

I/We (*) hereby withdraw from the contract concluded by me/us (*) for the purchase of the following digital products:

[...]

Ordered on [...], received on [...]

Name of consumer(s):

Address of consumer(s):

Signature of consumer(s) (only if this form is notified on paper):

Place, Date: [...]

(*) Delete as appropriate.

6.5. To meet the withdrawal deadline, it is sufficient for you to send your communication concerning your exercise of the right of withdrawal before the withdrawal period has expired.

6.6. Effects of withdrawal: If you withdraw from this contract, we shall reimburse to you all payments received from you without undue delay and no later than fourteen (14) days from the day on which we are informed about your decision to withdraw. We will carry out such reimbursement using the same means of payment as you used for the initial transaction, unless you have expressly agreed otherwise; in any event, you will not incur any fees as a result of such reimbursement.

6.7. Expiry of the right of withdrawal: For contracts for digital content not supplied on a tangible medium, the right of withdrawal expires prematurely if the Provider has begun performance and the Consumer has (i) expressly consented (e.g., by ticking a checkbox) to the Provider beginning performance before the end of the withdrawal period, (ii) acknowledged that they will lose their right of withdrawal once performance begins, and (iii) the Provider has provided the Consumer with a confirmation on a durable medium (e.g., by email).

7. Rights to Generated Content

7.1. The User receives a non-exclusive, worldwide and perpetual right to use the generated cards, including for commercial use and resale, subject to any third-party rights (in particular trademark, copyright, and personality rights) and subject to these GTC. This does not mean that every generated card, Copied Card, Print-Ready export, name, prompt, reference, character, motif, or text is legally clear for every use case. The Provider does not guarantee freedom from third-party rights or suitability for commercial use, resale, merchandising, print-on-demand, game publication, marketplace use, or any specific third-party service.

7.2. No exclusive rights are granted to the generated cards. Identical or similar cards may also be generated by other Users.

7.3. Use of the platform and the generated content is permitted only in compliance with these GTC, the applicable OpenAI terms and policies, and applicable law. OpenAI's terms and policies are available at: <https://openai.com/policies/>

The Provider is entitled to adapt the content policy and usage conditions to any changes in OpenAI policies and technical developments, subject to the applicable protections in these GTC.

7.4. The User is responsible for the lawful use of the content and its compatibility with third-party rights (e.g., copyright, personality, trademark rights). This includes responsibility for prompts, uploaded images, selected existing Card references, card names, card text, character references, brand references, and other materials supplied or selected by the User. Any liability of the Provider in this regard is excluded to the extent permitted by law.

7.5. The User is responsible for ensuring that only content for which the User has the necessary rights is made publicly visible on the Discovery Board, in a Public Profile, or in a Showcase.

7.6. Third-party brand names, game names, tabletop tools, marketplaces, print providers, or other services may be mentioned only descriptively where necessary. Unless expressly stated otherwise, Mythic Cards is not affiliated with, endorsed by, sponsored by, or officially connected to such third-party services.

8. Content Policy and Prohibited Content

8.1. The following content is prohibited from generation in particular and violates the content policy:

- Protected brands/characters (e.g., Disney, Marvel, Star Wars, etc.).
- Real persons without their consent.
- Content that glorifies violence, sexually explicit content, discriminatory content, or politically extremist content.
- Illegal, criminal, or insulting content as well as content that violates public morals or the platform guidelines.

8.2. The Provider reserves the right to update the content policy on an ongoing basis to reflect legal changes, technical changes, and requirements of the AI service provider (OpenAI). The current version is available on the platform and is binding.

8.3. The Provider is entitled to reject or delete User requests/content that violates this content policy.

8.4. In the event of material or repeated violations after a written warning in text form, the Provider may suspend User accounts and terminate the subscription without notice; Credits may be forfeited in such cases.

8.5. The content policy also applies to Public Profiles and Showcase cards. The Provider may restrict, hide, remove or disable Public Profiles, Showcase cards or public card visibility where content violates these GTC, third-party rights, applicable law or the content policy.

8.6. Users may report public or otherwise publicly accessible cards, Public Profiles, Showcase cards, or related public content where they believe that the content violates these GTC, the Content Policy, third-party rights, applicable law, safety requirements, or platform rules. A report does not automatically lead to removal, restriction, refund, or any specific action.

8.7. Reports may be reviewed by the Provider, admins, moderators, or authorized operators. After review, the Provider may in particular dismiss the report, mark the content as under review, restrict or remove public visibility, block Discovery, Showcase, Copy Function, like, ranking, or republishing features for the content, restore public eligibility, or take another appropriate measure. Restore or republishing after a moderation action is possible but not guaranteed.

8.8. A takedown or public-visibility block does not necessarily delete the card from the private Library of the owner. In serious or repeated cases, or where required for rights protection, security, legal compliance, or abuse prevention, the Provider may take further measures, including restricting accounts, Credits, uploads, public features, Copy Function access, or deleting content to the extent permitted by law.

8.9. Public web or thumbnail derivatives and already known public links may require separate technical handling. A public-visibility block in the platform database does not necessarily mean that every previously known file URL is immediately deleted or revoked, although the Provider may remove or revoke files where appropriate or required.

8.10. The Provider may restrict public visibility independently of the number of reports if the content, account behavior, or public interaction appears to violate the Content Policy, third-party rights, safety requirements, applicable law, anti-abuse rules, or the integrity of public platform areas.

9. Liability and Warranty

9.1. The Provider does not guarantee specific results or characteristics of generated content; in particular, the quality of generated cards may vary. Available quality levels are technical settings for the generation process and do not guarantee a specific artistic result.

9.2. Statutory provisions apply to defects of quality and title unless otherwise stipulated in these GTC.

9.3. The Provider is liable without limitation for damages arising from injury to life, body, or health that result from an intentional or grossly negligent breach of duty by the Provider, its legal representatives, or vicarious agents. For all other damages, liability for slight negligence is excluded.

9.4. Any further liability is excluded. This applies in particular to claims by third parties, such as claims by OpenAI against Users. The Provider does not provide indemnification.

9.5. Force majeure: The Provider is not liable for delays or failures caused by events beyond its control,

such as natural disasters, war, terrorism, labor disputes, governmental measures, failures of communication networks, power outages, or other unforeseeable, unavoidable, and serious events. The Provider expressly notes that it has no influence on technical limitations or outages of the AI service provider (OpenAI); such cases are treated as force majeure. If a force majeure event lasts longer than four weeks, either party may terminate the contract with immediate effect. Statutory claims remain unaffected.

9.6. The Provider is not liable for data loss or technical disruptions caused by third-party outages, force majeure, or technical issues not attributable to the Provider. Goodwill services, such as granting additional Credits, are voluntary and do not create any legal entitlement for the future.

10. Data Protection

10.1. The processing of personal data is governed by the Provider's privacy policy, which is available on the platform at the following link:

<https://mythiccards.ai/legal/privacy>

Further information on how personal data is handled, including purposes, legal bases, and data subject rights, can be found in the privacy policy.

10.2. Publicly visible profile and Showcase data may include in particular the creator name, Showcase cards, like counts and copy counts. Further details are set out in the privacy policy.

11. Term, Cancellation, Deletion and Discontinuation of the Service

11.1. By subscribing, you agree that your subscription will automatically renew after the agreed term for the originally agreed duration unless you cancel beforehand. You authorize us to charge the subscription fees for renewal using the payment method you have provided. The renewal price corresponds to the most recently charged regular subscription price, excluding limited-time promotional or discount prices. We will inform you in good time before any subscription price change becomes effective.

11.2. Cancellation of the subscription is possible with one month's notice to the end of the current billing period. Cancellation is available (i) via the cancellation button in your account ("Cancel now" under Settings → Subscription → Cancel) and (ii) via the public cancellation page at <https://mythiccards.ai/cancel-subscription> (no login required). If the cancellation button or cancellation page is temporarily

unavailable, cancellation may alternatively be made by email to info@mythiccards.ai. We will confirm the cancellation in text form (e.g., by email).

11.3. Users can delete their account at any time. Upon account deletion, all Credits are forfeited, subject to mandatory statutory rights. Account deletion initiates removal of the User's account, generated Cards and saved product content through the platform's deletion processes. Removal is not necessarily immediate. Temporary uploads, stored Card originals, public presentation files and backups may have different cleanup schedules. Limited technical, reference-provenance, billing, allowance, refund, legal-acceptance and security evidence may be retained where needed for accounting, support, security, legal defence or legal obligations, as described in the Privacy Policy. Retained evidence does not recreate the deleted account or make its Credits or allowance usable. Account deletion does not necessarily remove other Users' existing copies or immediately erase data held by service providers. The private-use restrictions for Copied Cards continue to apply.

11.4. The Provider may discontinue the platform with at least one month's notice without stating reasons. Users may use remaining Credits and download content during this period; no refunds will be granted.

11.5. For good cause not attributable to the Provider (e.g., permanent discontinuation or significant restriction of the current external service provider), the Provider is entitled to change the external service provider used for generating digital cards with at least four weeks' prior notice. The Provider will inform Users in text form. If the change results in a material deterioration of the agreed services, the

User has a special right of cancellation effective at the time of the change. Statutory claims and mandatory consumer protection rights remain unaffected.

11.6. In the event of material changes, restrictions, or discontinuation of the external AI service provider, the Provider will inform Users in good time about the effects on the platform and usage options in text form. In the event the external service provider is discontinued, the Provider is entitled to discontinue the platform without observing a notice period.

11.7. In the event of violations of these GTC, in particular abusive use of the platform, the Copy Function, public visibility, likes, Discovery placement, rankings, Creator Credits, or circumvention of technical safeguards, the Provider may take appropriate measures. Manipulation of likes, copy actions, public visibility, Discovery, Top Cards, creator rankings, Copy Rewards, Creator Credits, or similar public signals is prohibited. Appropriate measures include in particular temporary suspension of public features, Copy Function restrictions, Credit or reward restrictions, temporary suspension of the User account, permanent suspension after a written warning in text form, and termination of the user agreement without notice. Credits may be forfeited without compensation in such cases. The Provider is also entitled to block or delete content if there is reasonable suspicion that third-party rights are being infringed. Further claims and the assertion of damages remain reserved.

12. Final Provisions

12.1. The laws of the Federal Republic of Germany shall apply. Mandatory consumer protection provisions of the state in which you have your habitual residence remain unaffected.

12.2. If the customer is a merchant, a legal entity under public law, or a special fund under public law, the place of jurisdiction shall be the Provider's registered office.

12.3. The Provider is entitled to amend these GTC to the extent necessary to adapt to changes in law, technical developments, or requirements of third parties (in particular the AI service provider OpenAI). The User will be informed in text form at least four weeks before any intended changes take effect. If the User does not object within four weeks of receiving the notice, the changes shall be deemed accepted. The User will be specifically informed of the right to object and the consequences of failing to object. In the event of a timely objection, the existing contractual relationship will continue. In this case, the Provider has a special right of termination effective at the time the changes take effect.

12.4. Insofar as these GTC do not contain more specific provisions, the terms and policies set by OpenAI apply as a minimum standard for all Users.

13. Severability

13.1. If any provision of these GTC is or becomes invalid, the validity of the remaining provisions shall remain unaffected. The statutory provisions shall apply in place of the invalid provision.
